

INFINITE™

Automated Drilling System If you can imagine it, then we can integrate it.

DePeuter Electrical Solutions (DPES) has now developed and implemented a smart, easy to use, and fully integrated drilling control system. This new system has INFINITE™ possibilities, and you as a customer are in control.

All control systems, logging data, cameras and maintenance programs, are integrated into one platform, giving the operator an INFINITE™ range of possibilities to not only control the rig, but also maintain it.

Some of the INFINITE™ features available;

- »Access to 3rd party hardware when required
- »Fully redundant
- »All functions fully integrated into one operating platform, from VFDs to control systems for separate tools
- »PLC and PC based
- »Maintenance programs and logging per piece of equipment
- »Remote Access, Remote Viewing
- »Wireless access on the rig
- »Units of measure and language selectable
- »Data logging, for any operational data and alarms, WITS data transfer
- »Camera System fully integrated and remotely viewable
- »Imagine it, there are INFINITE™ more features, you chose and decide
