## Drilling Automation

From stand-alone TD controls to complete redundant PLC systems. DPES will deliver a safe, easy to use solution. We use only standard PLC components.

Automation solutions available:

- Auto Driller
- Power Management
- Remote Access
- Data logging
- Integration of all drilling controls
- Or any custom system as required

## Installation and Rig Up

Electrical rig up and installation services are available for any location. Either for land drilling rigs or off shore applications.

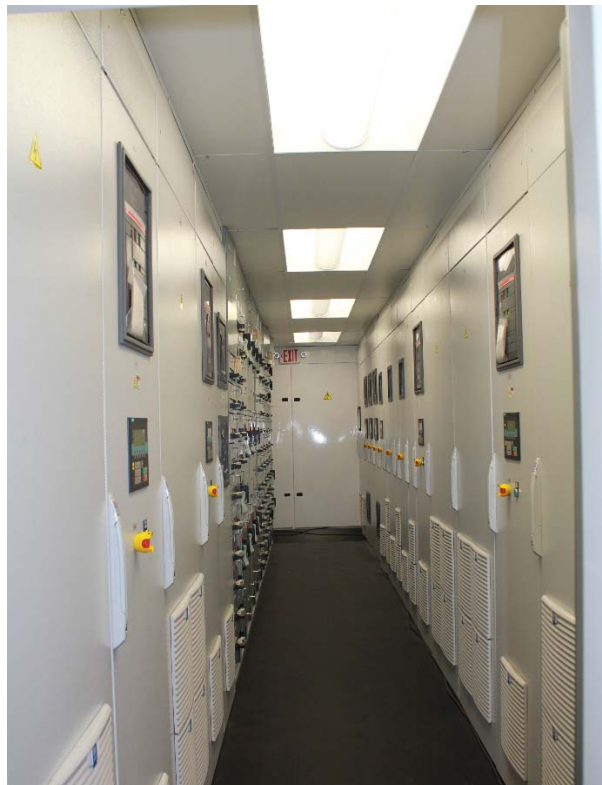

DPES can provide labor, parts and material. We will get the job done on time, safe and in budget.

## Service and Support.

24/7, worldwide quality support and service is what DPES provides to our customers. We are available by phone or on location, and even by internet when remote access functions have been activated in our automation package.

# Flexible solutions for Your business needs

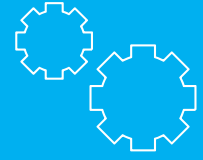

## VFD and SCR drives

From 4hp to 4,000hp DPES manufacturers variable speed motor drives utilizing only the highest quality of materials.

We can deliver air or liquid cooled VFD drives as well as a wide range of SCR drives.

All drives are designed and pre-programmed for your application including but not limited to Cement Pumps, Draw Works, Mud Pumps and Top Drives.

### CUSTOM SOLUTIONS

DPES is committed to providing solutions that fit our customers' needs.

From small to large projects, all of our customers will receive attention and dedicated service from our professional staff of engineers and technicians.

### WEB SOLUTIONS

New or retrofit systems can be outfitted with remote access. This will allow DPES to assist you without the need of being on location.

Remote access can be utilized for remote monitoring or engineering purposes.

Safety is the number one priority at all times.

### Contact us

Call or email today for more information or to set up a meeting so we can start assisting you with your current or future needs.
